Delirium

état confusionnel aigu : évaluation de l'acupuncture

1. Systematic Reviews and Meta-Analysis

2. Clinical Practice Guidelines

⊕ positive recommendation (regardless of the level of evidence reported)
Ø negative recommendation (or lack of evidence)

2.1. Scottish Intercollegiate Guidelines Network (SIGN, Scotland) 2019 Ø

Risk reduction and management of delirium. 2019. 53P. Scottish Intercollegiate Guidelines Network (SIGN). 2019:53P. [196456].

A number of studies of non-pharmacological interventions in ICU settings were identified. Interventions included **acupuncture**, mirror therapies, and range of motion exercises. Most of the studies were underpowered. Due to the heterogeneity of interventions and populations no single intervention for patients in ICU can be recommended.
